

**BUILDING THE
FUTURE TOGETHER**

RUBI PRESENTS THE NEW 2026 CATALOGUE WITH A COMMITMENT TO BATTERY-POWERED SOLUTIONS

- The RUBI 2026 Catalogue incorporates an exclusive chapter of battery-powered solutions and presents the TC 125 CAS circular cutter with a guide as one of its main novelties.
- In addition, **the company celebrates its 75th anniversary in 2026** as an international benchmark in solutions for ceramic installation.

Rubí (Barcelona), February 3rd, 2026. RUBI, which celebrates its 75th anniversary in 2026, presents its new 2026 product catalogue. This year's edition includes **more than 20 novelties** throughout its 292 pages and reflects the evolution of a brand that, since 1951, has grown together with professionals in the sector, promoting innovation, specialization and excellence at each stage of the ceramic installation process.

Among the new features of the catalogue, a specific chapter dedicated to **RUBI battery-powered products** has been incorporated, a category that continues to expand every year thanks to the evolution of cordless technologies and the growing demand for more versatile, safe and efficient solutions on site.

One of the most outstanding 2026 novelties in the catalogue is the **TC-125 G2 ENERGY CAS**: the first **circular cutter with a battery-powered guide**. It provides cordless cutting for large format tiles. Its exclusive design allows cuts of any length without restrictions, achieving perfect straight cuts from medium pieces to XXL formats.

Also noteworthy within the large format range is the new **OCTO KONG ENERGY suction cup**, which offers a smarter way of handling large tiles thanks to its battery operation, combining a secure grip on multiple surfaces with real-time information. **Safety and versatility in every use.**

In the range of diamond blades, RUBI presents the **SHARK blade**, which offers **maximum speed in wet cutting**. It also provides a consistent and accurate path on long wet cuts, both straight and miter.

The new 2026 catalogue is presented under the concept of the **RUBI Experience**, which is encompassed in the "5 steps to excellence": preparation, cutting and drilling, installation, grouting and cleaning. The entire range of RUBI products is identified according to the stage of the installation process to which it belongs, offering a visual and understandable solution that places the end user at the centre of RUBI's strategy.

Available in digital version on the RUBI website, the new catalogue brings together a careful selection of tools and solutions designed to transform the ceramic installation process through innovation and state-of-the-art technology.

About RUBI Group

Founded in 1951 in the city of Rubí (Barcelona), RUBI is today a leading brand in the sector of tools for cutting and installing ceramics, with 11 subsidiaries spread over 5 continents and recurring sales to more than 120 countries. It was created by the Boada brothers (formerly Germans Boada, SA, now RUBI TOOLS GROUP S.A.), with the purpose of being the best partner for their customers by providing them with a global solution of services and products and with a view to the end user, to whom they offer the widest range of tools to successfully undertake any ceramic installation project: tools for cutting, handling, transporting and installing ceramics. They constantly innovate in new solutions, manufacturing and marketing differential products at the forefront of the sector, their purpose is to make the work of installers safer, easier and more efficient.
