

**BUILDING THE
FUTURE TOGETHER**

NEW RUBI TC-125 G2 ENERGY CAS: CORDLESS LARGE FORMAT CUTTING

- An evolution for the TC-125 G2 corded cutter to offer a cordless model, improving speed regulation and completely renewed and adapted ergonomics.
- Especially recommended for large formats.

Rubí (Barcelona), August 26th 2026. RUBI, a world leader in tile cutting and installation tools, presents the evolution of the existing TC-125 G2 electric cutter from the SLIM range.

This new cutter has been designed to offer the installer a **cordless** cutting tool, capable of working in dimensions impossible to cut with a standard manual cutter. It thus becomes **the first battery-powered circular cutter designed especially for tiling professionals**, especially for the installation of large-format ceramics.

With a total weight of 9.5 lbs, it stands out for its lightness, facilitating both transport and storage. In addition, it speeds up the commissioning process, **allowing cuts to be made quickly**, reducing installation times and guaranteeing a cleaner execution thanks to its water and dust absorption system.

The new [TC-125 G2 ENERGY CAS](#) incorporates electronic **speed regulation in 6 positions** and is driven by a **brushless motor** together with the 18V CAS battery. The tool assembly offers an optimal cutting finish on both straight and mitre cuts, with minimal deflection ensuring impeccable precision.

In addition, it is compatible with the G2 set of guides, which means cost savings for professionals who already have other RUBI systems such as the Slim Cutter.

With the new **RUBI TC125 G2 ENERGY CAS** cutter, it reinforces its commitment to innovation, launching an efficient and adaptable solution for large-format cutting applications on the market.

At the same time, a [launch campaign](#) has been initiated for the new TC-125 G2 ENERGY CAS, focused on positioning the machine as an innovative solution within the ceramic cutting large formats market.

About RUBI Group

RUBI was founded in 1951 in the city of Rubí, Barcelona, and is now a leading brand in tools for tile cutting and installation. It has 11 subsidiaries across the five continents and recurring sales in over 120 countries. It was created by the Boada brothers (formerly Germans Boada, SA now RUBI GROUP SA) with the aim of being the best partner for their customers by providing them with a comprehensive service and product solution. It has a focus on end users, offering them the widest range of tools to successfully tackle any tile installation project: tools for cutting, handling, transporting and installing tiles. The company constantly innovates new solutions and manufactures and markets differential products at the forefront of the sector. The aim is to make the tile fitter's work safer, easier and more efficient.
